

Safety and Environmental Management Systems (SEMS)	Revision Number:	6
	Revision Date:	5/1/2020

30 CFR Part 250

Oil and Gas and Sulphur Operations in the Outer Continental Shelf

Safety and Environmental Management Systems Plan

Acknowledgement and Approval

Safety and Environmental Management is of primary importance in our operations. No business objective is so important that it will be pursued at the sacrifice of regulatory compliance. As employees each of us has the responsibility to make the safety of our co-workers, ourselves and environmental stewardship a primary concern. This objective is fundamental to our well-being, as well as the efficient operation of our business. Every employee has the responsibility to prevent spills, accidents and injuries by following established working rules, by practicing the principles taught in safety training and by providing ideas on how our environmental safety efforts might be further strengthened.

We have instituted this Safety and Environmental Management System (SEMS) which, with your help, will succeed in providing safe and healthy working conditions.

Scott Knight, Vice President – HSE & Regulatory
